## **User Stories**

“As a [persona], I [want to], [so that], [By how will you do it? ]”

**Example:** As a shopper I want to look for a specific product to buy. To do so there will be a search bar.

## **Administrator**

As an administrator, I want to create and moderate Users to control the application's activity.

- View all users, add/terminate user, view orders

As an administrator, I want to create and modify Users to better service a user's needs..

- View all users, add/terminate user, add categories

As an administrator, I want the user's login credentials to determine what products appear when shopping so that the user can find what they need faster.

- View all users, remove and create categories, assign categories to specific sellers

As an administrator, I want to modify product lists so I can adjust what is offered accordingly.

- View all users, be able to grant access to different product categories, be able to delete and create new users

As an administrator, I want to send reports to moderators so they can view their performance and activity.

- View all moderators, view all orders

## **Moderator**

As a moderator, I want to be notified if the product is out of stock so that there are no inventory issues.

- View listed products, show quantity of each product, allow the incrementation of the quantity

As a moderator, I want to view and modify my listed products so that I can adjust what is offered over time.

- View all listed products, option to remove or add products, option to change the price, quantity, and description of each product

As a moderator I want to see who bought my products so i can prepare orders

- View user, contact information, address, view if they are a new buyer

As a moderator I want to review orders so that i can see who and what was purchased in the past

- View all orders, view all buyer information, view recurring buyers and new buyers

As a moderator I want to view reports so that I can see how many products have been sold

- View order summaries (annual, monthly, weekly, daily), view recurring buyer information, view administrator info (for contact)

## **User/Shopper**

As a shopper I want to view a list of products so I can select some to purchase.

- View all products based on permissions, view descriptions, view seller information

As a shopper I want to see a description of the products to help encourage a purchase.

- View product, view title and image

As a shopper I want to review my order so I can make adjustments before checking out.

- View all products added, be able to remove, increase or decrease the quantity, view seller information

As a shopper I want to check out so I can receive my products.

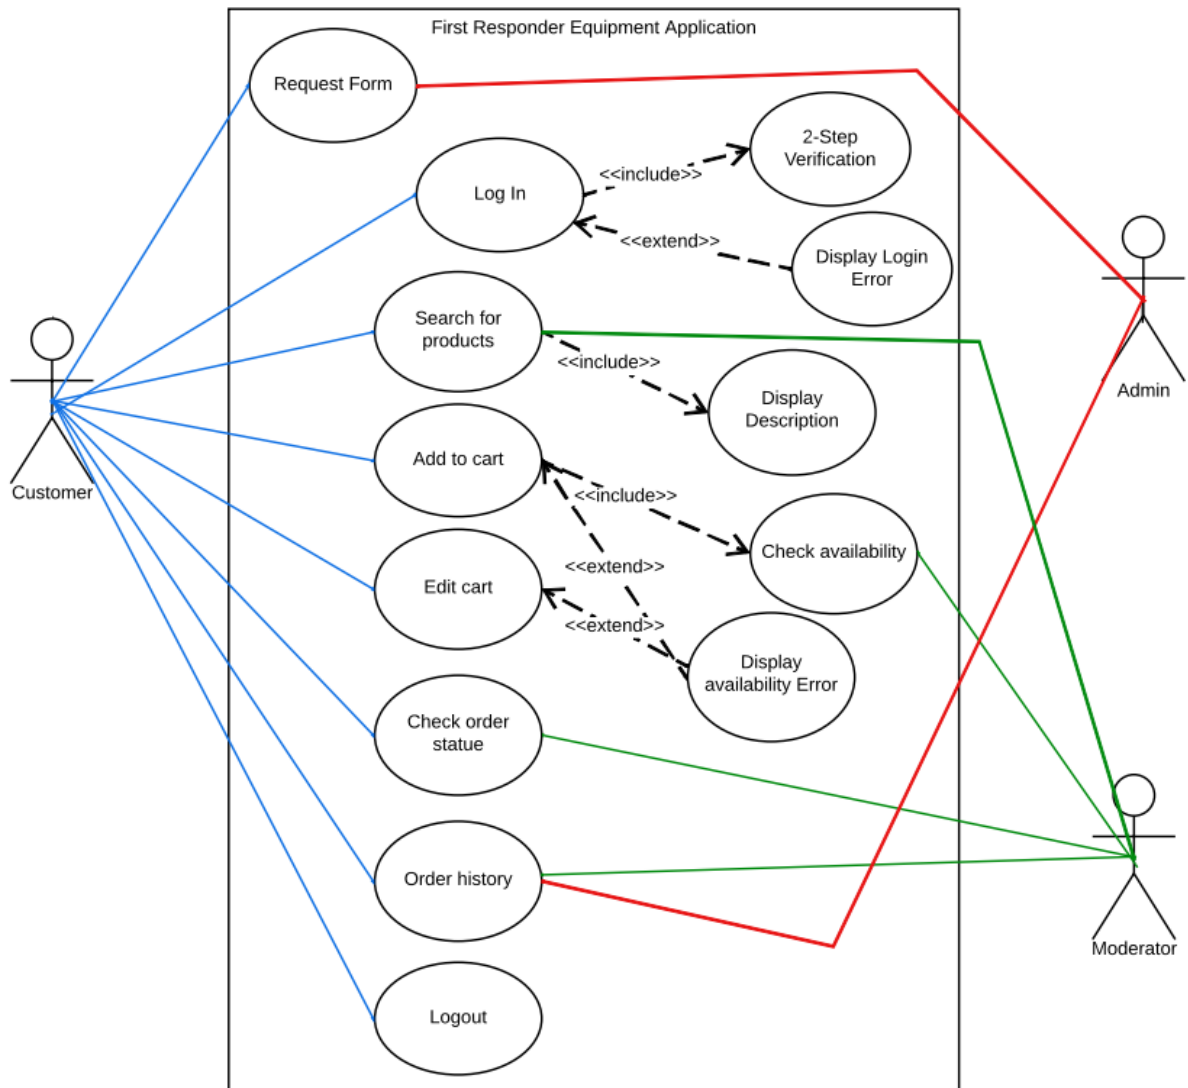

- Be able to enter address, payment option, seller information

As a shopper I want to review my order history so I can view what I've purchased in the past.

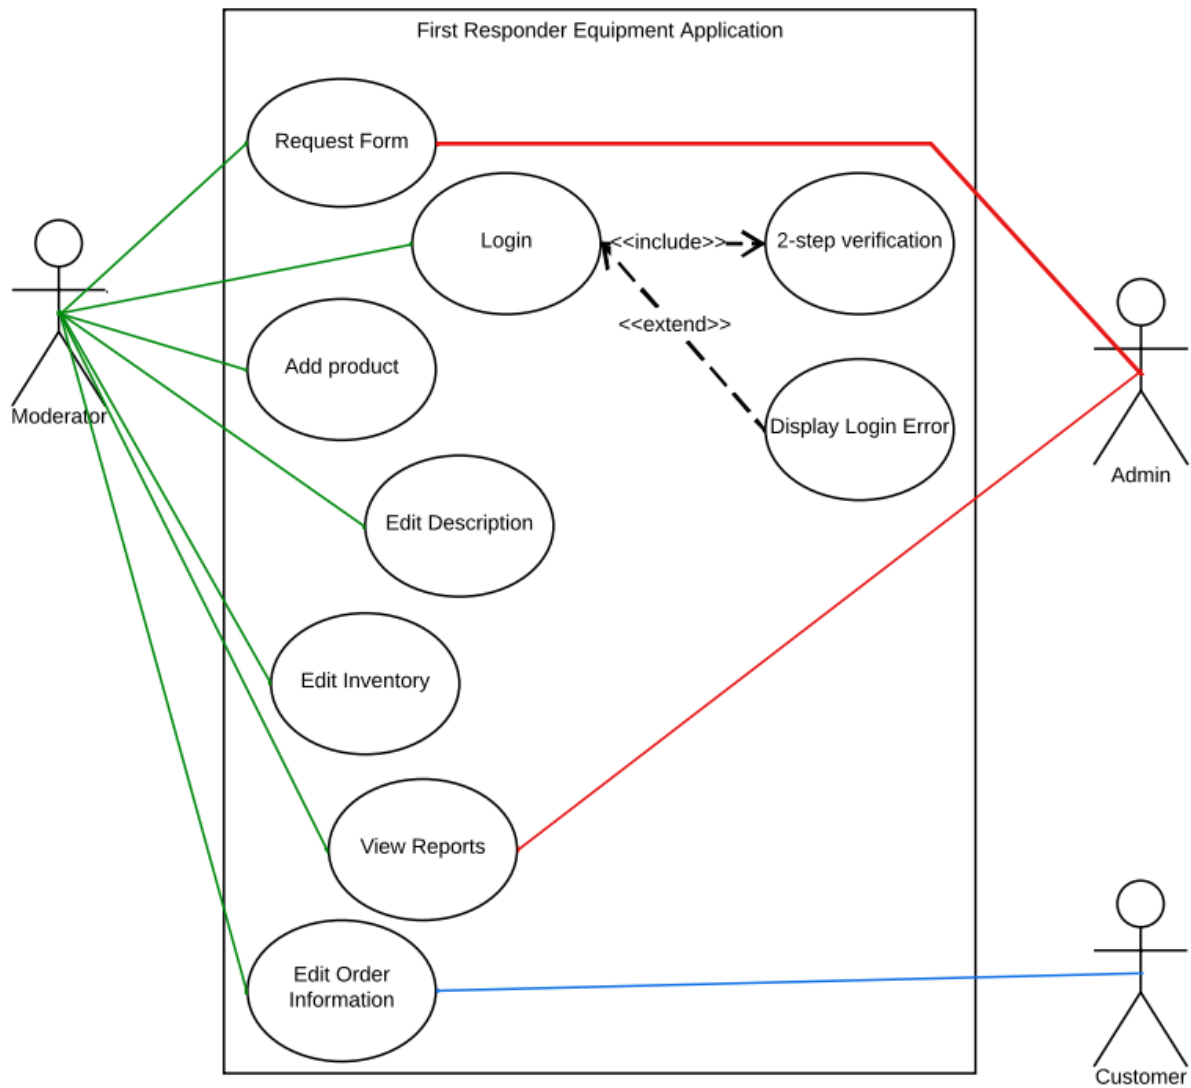

- View all orders, view status, view seller information, provide option to make that order again

## **Use Cases**

## Customer

## Moderator

## Administrator
